

SOUTH PLACER MUNICIPAL UTILITY DISTRICT POLICIES

Policy Name:	2020 – INJURY AND ILLNESS PREVENTION		
Approval Authority:	SPMUD BOARD OF DIRECTORS	Adopted:	09/03/2015
Resolution No.	15-23	Revised:	

PURPOSE

This policy augments and supplements state law and mandates that the South Placer Municipal Utility District (District) will establish, implement, and maintain a written Injury and Illness Prevention Program that includes the preparation of a District Safety Manual.

POLICY STATEMENT

Section 1. General

It is the Board’s policy to take all practical steps to safeguard employees and the public from accidents and to provide a safe and healthy work environment. An Injury and Illness Prevention Program, which will conform to the requirements of SB 198 and the Standards promulgated in response thereto by the California Occupational Safety and Health Standards Board, will require more than just the implementation of this policy. Full compliance will require an in-depth and individualized assessment of the District’s current workplace conditions, practices, and problems. Said assessment must be documented and include a safety and health survey, workplace assessment, evaluation of assessment information, development of an action plan, implementation of said plan, and ongoing maintenance of the program.

Section 2. Program Goal and Outline

The goal of the District is to provide safe and healthful working conditions for all of its employees. Therefore, the District will maintain a safety and health program conforming to the best practices of agencies of this type. The District's safety and health program will include:

1. Providing mechanical and physical safeguards to the maximum extent possible.
2. Conducting a program of safety and health inspections to find and eliminate unsafe working conditions or practices, to control health hazards, and to comply fully with the safety and health standards and law for every job.
3. Training all employees in good safety and health practices.
4. Providing necessary personal protective equipment, and instructions for use and care.
5. Developing and enforcing safety and health rules and requiring that employees cooperate with these rules as a condition of employment.
6. Investigating promptly and thoroughly, every accident to determine its cause and correct the problem so it will not happen again.
7. Developing a system of recognition and awards for outstanding safety service and/or performance.

Section 3. Program Responsibility.

Although the District recognizes that the responsibility for safety and health is shared, the General Manager shall be responsible and have full authority for implementing this policy and the District's Injury and Illness Prevention Program.

The District accepts responsibility for leadership of the safety and health program, for its effectiveness and improvements, and for providing the safeguards required to ensure safe conditions.

Supervisory personnel are responsible for developing proper attitudes toward safety and health for themselves and in those they supervise, and for ensuring that all operations are performed with the utmost regard for the safety and health of all personnel involved, including themselves.

No employee will be required to work at a job he/she knows is not safe or healthful. Employees are responsible for wholehearted, genuine operation of all aspects of the safety and health program -including compliance with all rules and regulations - and for continuously practicing safety while performing their duties. Any employee found not practicing safety while performing their duties will be subject to appropriate discipline.

Section 4. Injury and Illness Records

The District's recordkeeping system for its Injury and Illness Prevention Program shall conform to Cal/OSHA standards. Records shall be used to measure and evaluate the success of said program.

A report shall be obtained on every injury or illness requiring medical treatment. Each injury or illness shall be recorded on the "Cal/OSHA Log and Summary of Occupational Injuries and Illnesses," Cal/OSHA Form 200, according to its instructions.

A supplementary record of the occupational injuries and illnesses shall be prepared on OSHA Form 5020, "Employer's Report of Injury or Illness."

Annually, the summary Cal/OSHA Form 300 shall be prepared and posted no later than February 1 in a place easily observable by employees. Said form shall remain posted until March 1.

All records specified in this section shall be maintained in the District's files for a minimum of five years after their preparation.

Section 5. Documentation of Activities

Records shall be maintained of steps taken to establish and maintain the District's Injury and Illness Prevention Program. They shall include:

1. Records of scheduled and periodic inspections as required by Cal/OSHA [*California Code of Regulations, Title 8, Chapter 4*] to identify unsafe conditions and work practices. The documentation must include the name of the person(s) conducting the inspection, the unsafe conditions and work practices identified, and the action taken to correct the unsafe conditions and work practices. The records are to be maintained for at least three (3) years.

2. Documentation of safety and health training required by Cal/OSHA [*California Code of Regulations, Title 8, Chapter 4*] for each employee. The documentation must specifically include employee name or other identifier, training dates, type(s) of training and the name of the training provider. These records must also be kept for at least three years.

Section 6. Program Communication System.

Readily understandable communication shall be maintained with all affected employees on matters relating to occupational safety and health, including provisions designed to encourage employees to inform the District of hazards at the worksite without fear of reprisal. Communications with employees shall include meetings, training programs, posted written information, and a system of anonymous notification by employees about hazards.

Written communications to employees shall be in a language they can understand. If an employee cannot read in any language, said communication shall be made orally in a language they can readily understand.

The District's Code of Safe Practices shall be posted online and at a conspicuous location in the District's maintenance office and shall be provided to each supervisory employee who shall keep it readily available.

Periodic meetings of supervisory employees shall be held under the direction of the General Manager for the discussion of safety problems and accidents that have occurred. Documentation of these meetings shall be maintained for three years.

Supervisory employees shall conduct "toolbox" or "tailgate" safety meetings, or equivalent, with their crew(s) at least every ten working days to emphasize safety. Documentation of these meetings shall be maintained for three years.

General employee meetings shall be conducted (at least one per quarter) at which safety is freely and openly discussed by those present. Such meetings should be regular, scheduled, and announced to all employees so that maximum employee attendance can be achieved. Documentation of these meeting shall be maintained for three years. Discussions at these meetings should concentrate on:

1. Occupational accident and injury history within the District, with possible comparisons to other similar agencies.
2. Feedback from employees.
3. Guest speakers from the District's workers' compensation insurance carrier or other agencies concerned with safety.
4. Brief audio-visual materials that relate to the District's operations.
5. Training programs shall be conducted when new equipment, machinery, or tools are purchased.
6. Employees shall be instructed in the safe operation of said equipment, machinery, or tools.
7. Documentation of training programs shall be maintained for three years.
 - a. New employees shall be trained by their supervisor in the safe operation of the equipment, machinery, and tools with which they will be working prior to being allowed to work independently. Documentation of new employee training shall be maintained for three years.

8. Posters and bulletins relating to and encouraging safe and healthy practices shall be posted on a rotational basis at a conspicuous location in the District's maintenance office.
9. News articles and publications devoted to safety shall be distributed to employees. This policy shall also be distributed to all employees upon its adoption, to all new employees at the time of their hiring, and annually thereafter.

Section 7. Hazard Assessment and Control.

Periodic safety inspections shall be conducted to identify existing hazards in the workplace, or conditions, equipment, and procedures that could be potentially hazardous. The inspections shall be conducted by personnel who, through experience or training, are able to identify actual and potential hazards and who understand safe work practices.

Safety inspectors will observe if safe work practices are being followed and will ensure that unsafe conditions or procedures are identified and corrected properly.

Safety inspections will be conducted at least annually. The frequency of the inspections will depend on the operations involved, the magnitude of the hazards, the proficiency of employees, changes in equipment or work processes, and the history of workplace injuries and illnesses.

A written assessment shall be prepared after said inspections which will document identified hazards and prescribe procedures for the elimination of same, and measures that can be taken to prevent their recurrence.

The General Manager will review written inspection reports and/or assessments and will assist in prioritizing actions and verify completion of previous corrective actions. They shall also review the overall inspection program to determine trends.

Section 8. Accident Investigation

All accidents shall be thoroughly and properly investigated by the District Superintendent with the primary focus of understanding why the accident or near-miss occurred and what actions can be taken to preclude recurrence. A written report of said investigation shall be prepared which adequately identifies the cause(s) of the accident or near-miss occurrence.

1. The investigation must obtain all the facts surrounding the occurrence: what caused the situation to occur; who was involved; was/were the employee(s) qualified to perform the functions involved in the accident or near-miss; were they properly trained; were proper operating procedures established for the task involved; were procedures followed, and if not, why not; where else this or a similar situation might exist, and how it can be corrected.
2. The accident investigator must determine which aspects of the operation or process require additional attention (what type of constructive action can eliminate the cause(s) of the accident or near-miss).
3. Actions already taken to reduce or eliminate the exposures being investigated should be noted, along with those remaining to be addressed.

4. Any interim or temporary precautions should also be noted. Any pending corrective action and reason for delaying its implementation should be identified.
5. Corrective action should be identified in terms of not only how it will prevent a recurrence of the accident or near-miss, but also how it will improve the overall operation. The solution should be a means of achieving not only accident control, but also total operation control.

Section 9. Code of Safe Practices. Use of Tools, Equipment and Machinery

The District shall adopt a Code of Safe Practices that governs work activities and shall set forth procedures for the use of tools, equipment, and machinery in a safe manner.

All employees shall follow safe practices rules, render every possible aid to safe operations, and report all unsafe conditions or practices to the Superintendent or General Manager. Supervising employees shall insist on employees observing and obeying every rule, regulation, and order as is necessary to the safe conduct of the work and shall take such action as necessary to obtain observance. Workers shall not handle or tamper with any electrical equipment, machinery, or air or water lines in a manner not within the scope of their duties, unless they have received instructions from the District Superintendent.

Only appropriate tools shall be used for the job. All tools and equipment shall be maintained in good condition. Damaged tools or equipment shall be removed from service and tagged "DEFECTIVE."

The appropriate equipment shall be used for the job and in a manner that is safe and in accordance with the manufacturer's recommendations. Only authorized and trained persons shall operate machinery or equipment. Machinery shall not be serviced, repaired, or adjusted while in operation except on equipment that is designed or fitted with safeguards to protect the person performing the work. Where appropriate, lock-out procedures shall be used.
