

### WHERE DOES MY SEWER GO?

Have you ever wondered where SPMUD sewer is located near your home? Now there is a Public Webmap Viewer available on the SPMUD website where you can search addresses, locate sewer features, turn on aerial imagery, and discover information about the sewer manholes, mainlines, and service lines that carry our sewer to the treatment plants in Roseville. The webmap displays Geographic Information System (GIS) data that is continually updated by SPMUD staff both in the field and in the office.

GIS is defined as a framework for collecting, displaying, managing, and analyzing geospatial information. SPMUD staff uses GIS as a tool to locate features in the field, make decisions on where repairs or replacements are required, and create work orders for routine maintenance.

Please visit [www.spmud.ca.gov/district-map](http://www.spmud.ca.gov/district-map) to launch the webmap and discover where sewer features are near your home.

### FALL NEWS 2021

### SEWER PROBLEMS?

If you are experiencing a sewer problem, such as plumbing backing up, slow drains, sewer overflowing either inside your home or from the sewer clean out

**PLEASE CONTACT US IMMEDIATELY**

**916-786-8555**

SPMUD crews will determine whether the problem is the District's to resolve or whether you should call a plumber. SPMUD has staff on-call 24/7 to address these sewer related issues. There is no charge for this service.

### DISTRICT AWARDS

The District was recently awarded the California Water Environment Association's (CWEA) highest honor in the State, the **2020 Collection System of the Year Award** for a medium-sized system.

The District was also awarded the **Certificate of Achievement for Excellence in Financial Reporting** from the Government Finance Officers Association (GFOA) for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2020. The Certificate of Achievement is the highest form of recognition in governmental accounting and financial reporting.

## REDISTRICTING

The South Placer Municipal Utility District was formed and organized under the Municipal Utility District Act (or “MUD Act”) of the State of California (California Public Utilities Code Section 11501 et seq.). The MUD Act established a “from-district” electoral system, in which a Director must be a resident and voter of the ward they represent but is elected at-large by all voters of the District. This is considered to be a hybrid electoral system, between an at-large system and a by-district system.

Following the release of the 2020 Census results and prior to the next General Election in 2022, the District intends to transition to by-district elections, in which the elected official must reside in a particular district (ward) and be elected by only those voters residing within the same district (ward). The District will seek community input during this process and will work with specialized electoral consultants in the mapping of the new electoral divisions in compliance with the Federal Voting Rights Act and the California Voting Rights Act. A webpage has been created <https://spmud.ca.gov/redistricting> that will be updated as this process is underway to reflect the District’s progress.

## ENJOY A FOG (FATS, OILS, & GREASE) FREE HOLIDAY SEASON

The South Placer Municipal Utility District wishes you a happy holiday season and wants to remind you to properly dispose of FOG during holiday festivities. FOG is a common cooking byproduct and could cause a sewer overflow that could ruin your holidays. As you prepare to host family gatherings and other events during the holidays, remember to avoid sending FOG down the drain.

Some residents make the mistake of pouring cooking oils and grease down the kitchen sink or flushing it down the toilet. This is especially true during the holiday season when families may be frying turkeys or preparing foods that contain large amounts of FOG. Over time FOG will stick to pipes and accumulate within the private and public portions of the sewer system, potentially clogging sewer lines and resulting in releases of sewer into homes or on the street. A sewer overflow is the last thing you want when guests are over for the holidays.

Instead, wipe FOG from pots, pans, and dishware with a paper towel before washing and dispose of the paper towel in the trash. Larger quantities of fats, oils, and grease should be scraped off using a spatula, placed in

a non-breakable jar or can with a lid and stored in the refrigerator or freezer. Once you have filled your jar or can, take advantage of SPMUD’s Free FOG Pick-Up Program. Label your jar as “SPMUD/FOG” and place it on your front doorstep. Then call SPMUD at (916) 886-2976 or email [FOGProgram@spmud.ca.gov](mailto:FOGProgram@spmud.ca.gov) for pick up!

By working together to keep FOG out of the drains, we can prevent costly and inconvenient cleanups and accomplish the District’s mission of protecting public health and preserving the environment of the community we all share.
